

# UNIVERSITY OF KRAGUJEVAC SERBIA

FACULTY OF MEDICAL SCIENCES

# Message

**Prof. Vladimir Jakovljevic**

*Dean, University of Kragujevac*

*The ultimate goal of medicine and biomedical research is to serve humanity. That focus informs everything we do, from admissions to curriculum design to teaching and mentoring.*

*As the Dean of the Faculty of Medicine at Kragujevac University, it is my privilege to speak about our medical program. From the student selection process to the curriculum and training, our program is designed to develop students into competent practicing physicians.*

*The curriculum we follow is comprehensive and meets the highest standards of medical education. We have certain criteria to accept students and we want to give an opportunity to those that possess a serious approach to the medical profession. Personal characteristics of an applicant such as motivation, maturity, compassion and ambition for a career in medicine also play a very important role in our selection process.*

*Our medical school pioneered programs in physician and medical humanities, and professional formation. Our new medical education curriculum, Foundations and Frontiers, reshapes and builds upon the best of what we've had, adding emerging areas such as population health, health informatics and the business of medicine.*

*We have dedicated professors that are well qualified and have great experience in training medical students. The teaching faculty has experience and is familiarized with the medical licensing exams, and proficiently prepares students for these exams. With our small class sizes, our faculty can take a personal interest in each student's success.*

*Not only do we concentrate on the theoretical aspects of medicine, but we emphasize practical education. We utilize plastinated organs which are excellent tools for teaching gross anatomy and it allows students to understand the human body as a whole. With our dedicated facility to conduct the various labs, students will gain the experience needed to fully understand medicine from a practical purpose.*

*Diversity in our faculty, professional staff and students has always been fundamental to our mission. Respect for culture and understanding diversity as part of the fabric of everyday life are essential to medicine as a profession and to the advancement of research that leads to international collaborations.*

*Finally, our school has a caring administrative staff. Everyone is friendly, sincere and always approachable. We want to make sure you are comfortable while pursuing your career in the field of medicine.*

*We wish you all the best for your future academic endeavours and welcome to faculty of Medicine, Kragujevac University.*

*Best wishes*

# About Serbia

Capital : Belgrade

Literacy Rate: 99.48%

Temperatures :  
(Winter) Dec.- Jan. 0-5°C  
(Summer) June - July 22-26°C

Serbia is expected to complete its negotiations by the end of 2024, allowing it to join the Union by 2025.

- Landlocked country in Southeast Europe which covers part of the Pannonian Plain and Central and Western Balkan Peninsula.
- Serbia officially applied for European Union membership on 22 December 2009. Accession negotiations are currently ongoing.
- First through the introduction of Eastern Christianity in the Early Middle Ages. The Serbian Orthodox Church has many monasteries built in the Serbian Middle Ages. Serbia was influenced by the Republic of Venice as well, mainly through trade, literature and romanesque architecture.

# Kragujevac

- Serbian Cyrillic: Kragujevac is the fourth largest city in Serbia.
- It is the administrative Centre of Šumadija District, located on the banks of the Lepenica River and surrounded by mountains Rudnik, Crni Vrh and Gledić mountains. According to the 2011 official results, the city has a population of 179,417 citizens. It is 140 km away from Belgrade, Capital of Serbia.
- Kragujevac was the first capital of modern Serbia and the first constitution in the Balkans was proclaimed in the city in 1838.
- During the 19th century, Serbia's first grammar school (gymnasium), first higher education institution, first theater, first judicial court, first pharmacy, first library and many other institutions were all founded in Kragujevac. The first Serbian newspaper printed and published in Serbia also had its origin in Kragujevac.

# University of Kragujevac

- University of Kragujevac rose from the foundations of the Lyceum of the Principality of Serbia, the first higher education institution in modern Serbia, established in Kragujevac by the decree of Prince Milos Obrenović on July 1st, 1838
- Its first rector was Atanasije Nikolic (1803 – 1882). The Lyceum of the Principality of Serbia planted the seed of higher education from which first modern higher education institutions originated in the beginning of the 1960s.
- Today the University of Kragujevac is a modern education and research center embracing almost all major areas of teaching and research, with a student population of 20,000 and 1,200 academic staff.

# Faculty of Medical Sciences, Kragujevac

- The University in 2020 is a generator and driver of innovations in the field of education and research which through the internationalization encourages the synergy of all University members, giving the strong contribution to the strengthening and improvement of University's reputation in the country and abroad.

- The Faculty of Medical Sciences was founded on November 17, 1977.
- This young and modern institution is woven with the spirit of tradition and climate in which it was created. Its' invaluable cultural and educational heritage from the heart of Serbia breathes with cold management practice in which the quality is the only criterion: the quality of teachers, the quality of teaching content, the quality of communication with the environment.
- Everything is dedicated to high-quality young people, to our students who we teach about life, science and ethics in this school.

# Pharmacy- IAS

(Integrated Academic Studies)

Pharmacy Single Cycle Degree

Combined Bachelor & Master's Degree

- The first generation of INTEGRATED ACADEMIC STUDIES OF PHARMACY was enrolled in 2005, while we are welcoming the first generation of international students this year.
- The study program Pharmacy - Integrated Academic Studies from University of Kragujevac aims to form competent graduate pharmacists- Masters of Pharmacy, who will be able to work independently within complex jobs that require higher education in the pharmaceutical industry, regulatory bodies and health care system. Pharmacy studies in English will enhance the development of the academic community and the pharmaceutical profession in the Republic of Serbia.
- Pharmacy consists in 5 years and aims to provide theoretical and practical knowledge to train graduates with a solid scientific basis, which is necessary for the practice of the profession of Pharmacist and for operating in the health field as experts in the drug and health products, in an international environment.
- The degree program exposes the students to the acquisition of transversal knowledge useful for the profession, and to detailed studies on: Pharmacotherapy and patient adherence to chronic therapies; knowledge of biotechnological drugs; Pharmacovigilance; health promotion;

knowledge of medical devices. The Course also provides knowledge of elements of Bioethics, Genetics, Epidemiology and Clinical Pathology, which complete the professional figure of the graduates.
